

**USG Corporation** is North America's number one building materials manufacturer and distributor. As the inventor of wallboard and ceiling tile, USG created North America's materials industry and we continue to be its leading innovators. Our ability to innovate has made us number one in the North American wallboard and joint treatment markets, number two in the ceilings market and helped us become the \$5.1 billion organization we are today.

Our world-renowned brands include SHEETROCK Brand gypsum panels, DUROCK Brand cement board, FIBEROCK Brand gypsum fiber panels, DIAMOND and IMPERIAL plasters, and DONN Brand grid. Not only are these products known around the world, they are used in your home. In fact, our products are found in one out of three American houses. We sell a bucket of joint compound every second of every day, and most homes and commercial buildings contain one or more USG products.

USG Corporation has an immediate opening for an Environmental Services Manager. This position is located in our Chicago, IL headquarters.

**Position Description:**

- This position serves as an environmental professional taking a leadership role in providing multi-discipline environmental guidance, support, and management to the manufacturing sites and all business units of the Corporation.
- Guide the development and implementation of environmental regulation and technology requirements to improve performance and enhance compliance through out the Corporation. Provide guidance to USG Manufacturing, Engineering, and other applicable departments regarding environmental permits for new and modified (including raw material changes) manufacturing operations. Assist manufacturing plant personnel in obtaining required permits and permit modifications.
- Assist in negotiations with Federal, State and local regulatory agencies for the resolution of non-compliance matters and regulatory developments. Assist in the retention and management of outside consultants and outside attorneys.
- Evaluate new raw materials for environmental impacts and provide recommendations of the environmental requirements to use the raw materials.
- Conduct audits of manufacturing facilities as assigned and assist plant in developing action plans to audit findings. Provide compliance training and oversight to corporate departments and plant management as assigned.

### **Position Requirements:**

- Bachelor's Degree required (Environmental, Engineering or Sciences strongly preferred). Post-graduate degree is a plus.
- **Seven to ten years** of escalating professional experience in all aspects of environmental compliance. An emphasis in air compliance and permitting (NSR, Title V, PSD, etc.) and experience working with manufacturing functions is preferred.
- Technically knowledgeable of environmental regulations and requirements (state, federal, and international).
- Strong written and oral communication skills. Ability to manage multiple projects and priorities. Ability to work in a team environment.
- Strong managerial skills, computer skills, solid decision making abilities, and a self-starter. Ability to travel up to 40-50%.
- Candidates must be authorized to work in the United States.

USG offers a comprehensive benefits package that includes medical, dental, vision, and life insurance; retirement and investment plans; paid holidays and vacations; tuition reimbursement. Relocation is not provided.
